IRRIGATION DEPARTMENT

Limited Competitive Examination for the Recruitment to Posts of Grade III in Sri Lanka Technological Service in the Irrigation Department - 2026

APPLICATIONS are hereby called from qualified officers serving in the Irrigation Department for the limited competitive examination to be held for the recruitment to below mentioned posts in Sri Lanka Technological Service in the Irrigation Department under the Ministry of Agriculture, Livestock, Land and Irrigation. This examination will be conducted by the Commissioner General of Examinations, in the **District of Colombo in February 2027**. The Director General of Irrigation has the authority to postpone or cancel this examination.

- The application has been published through **"Online Applications-Recruitment Exams/E.B. Exams" under "Our Services**" on the website **www.donets.lk** of the Department of Examinations, Sri Lanka. Applications can strictly be submitted online. Accepting online applications **will be commenced on 26th October 2026 at 9.00 a.m. and will be ended on 25th November 2026 at 9.00 p.m.**

- Officers shall hand over a copy of the application to the Head of Institution, to be attached to their Personal File. A copy of the application certified by the Head of Institution and a letter of service confirmation shall be provided when called for the Interview.

- The applicant must bear any unfavorable situation caused by delaying the submission of applications until the closing date.

1.0. Posts expected to be recruited

Serial No.	*Designation*	*Number of vacancies*	*Grade to be recruited*
1.	Draughtsman	39	Training Grade (For the training of one year)
2.	Drilling Assistant	02	Training Grade (For the training of one year)
3.	Research Assistant (General)	01	
4.	Civil Engineering Material Surveyor	06	
5.	Soil Cartographer	01	
6.	Hydrological Assistant	03	
7.	Hydrological Field Assistant	01	
8.	Research Assistant (Engineering Materials)	01	
9.	Soil Surveyor	04	
10.	Research Assistant (Hydraulics)	01	
11.	Mechanical Foreman	04	Grade III

1.1. Nature of the duties of posts

Serial No.	*Designation*	*Assigned duties*
1.	Draughtsman	1) Preparation of/ Checking detailed plans from designed sketches, basic parameters and drafts given by the Engineering staff: Preparation of / Checking plans, contour maps, longitudinal section and cross section plans from land surveying and levelling: Preparation of/ Checking blocking-out plans, plans of land acquisition, plans of operation and maintenance etc. of irrigation projects 2) Calculation of quantities: Rate analysis: Preparation of/Checking bills of quantities

Serial No.	*Designation*	*Assigned duties*
		3) Checking work estimates, Preparation of/Checking forms, schedules related to procurement process according to work estimates: Checking measurement books, payment bills, final payment records and plans related to payments for work. 4) Maintenance of records of technical operations and data in irrigation projects. Preparation of/ checking progress reports. 5) Custodianship and maintenance of plans, structural drawings, other drawing office documents, materials and instruments Any other duties related to draughtsmanship assigned by the executive/ management.
2.	Drilling Assistant	• Testing the strength of ground, ground water leakage etc for major and medium scale constructions. • Collecting rock and soil samples from soil layers of different soil depth levels for foundations of major constructions • Taking measures to prevent leakage in rock layers and strengthening those. • Strengthening of completed constructions taking measures for water leakages and other shortcomings by injecting cement and chemicals, and by surface concrete lining by machines. • Submission of reports related to above tasks. Operation, maintenance and repairing of drilling machines, water pumps and other instruments and relevant diesel and petrol machinery required for above tasks.
3.	Research Assistant General)	• Analysis for determining physical and chemical properties of soil and water samples required for feasibility studies of ongoing and proposed irrigational projects and other development projects. • Preparation of solutions and reagents accurately. Proper handling, accurate calibration and proper maintenance of modern microelectronic, electric and electromechanical instruments used in day-to-day analysis. Processing of data obtained from analysis.
4.	Civil Engineering Material Surveyor	• Surveying of engineering materials required for constructions of irrigation projects of Irrigation Department, quality controlling of the engineering materials (about the properties and strengths of soil and concrete materials) and certifying the standards. • Engage in engineering materials research activities for constructions carried out on the requests by government and private institutions
5.	Soil Cartographer	• Agglomerate and compiling soil survey and soil usage maps • Drawing and coloring maps using data given • Preparing final soil map from the draft soil map

Serial No.	*Designation*	*Assigned duties*
		• Preparation of land classified, soil and land use maps using aerial photographs and engineering surveys. Coloring of maps and calculation of areas, drawing of scaled up and scaled down maps: Drawing geographic plans for various soil profiles, Preparations of graphs and drawing for reports issued by the division. Preparation of necessary things for printing color maps. • Preparing soil maps using computer software
6.	Hydrological Assistant	By applying scientific theories practically, calculation and analysis of hydrological and climatological data collected based on river basins and reservoirs island wide Sri Lanka for hydrological requirements. Computerization of data, and analysis of data using computers. Preparation and maintenance of daily, monthly, annual and long-term reports. Preparation of said information for public and related institutions. • Assure the accuracy and supervise the quality of collected hydrological and climatological data and regularly maintaining the certified data bank. • Collecting and computerizing data to predict increasing of the water levels in rivers and studying the flood-prone areas using new mathematical models. • Surveying and mapping the flood damage levels and flood-prone areas through field investigations. • Collection of data frequently and giving warnings accordingly during a flood situation or when getting close to a flood situation in major rivers.
7.	Hydrological Field Assistant	Maintaining hydrological unit office in selected river valleys by the hydrology Section and collecting required weather data, rainfall, river water levels and changes in the water level of nearby tanks • Submitting all the collected hydrological and weather data to the Head Office at the end of each month in order to check and record. • Measuring the discharges of rivers and tributaries at such water levels. Continuously sending the field data required for early warning at times of a flood situation or when getting close to a flood situation in major rivers to the Head Office, keeping records of the changing flood levels with time at times of major flooding.
8.	Research Assistant (Engineering Materials)	Carrying out research according to given specifications on the suitability of engineering materials required for the constructions of irrigation projects at the Irrigation Department and certifying standards based on research findings: Engaging in quality control of engineering materials (characteristics and strengths of soil and concretes) upon the requirement of the service. Carrying out research on engineering materials and certifying the standards for the constructions carried out on the requests of Government and private institutions
